**SUMMARY**

The purpose of this report is to inform the Lake Wyangan & Catchment Management Committee about the NSW Sustainable Communities Program (NSW SCP), with particular focus on the Economic Development and Infrastructure Round, and to outline the opportunity for the Committee to propose suitable projects for a potential grant application.

The NSW Sustainable Communities Program is a \$160 million initiative designed to support regional NSW communities, businesses and industries affected by water recovery under the Murray-Darling Basin Plan. The program seeks to reduce the social and economic impacts of water recovery, particularly in communities exposed to the Australian Government's Voluntary Water Purchase Program for the 450 GL.

The program has a strong focus on:

- Strengthening Basin communities;
- Supporting and sustaining local jobs;
- Encouraging innovation and economic diversification;
- Delivering infrastructure that enables people to continue living and working locally.

An Early Investment Round of \$16.3 million has already been delivered, providing early assistance to communities assessed as being most at risk.

The \$70 million Economic Development and Infrastructure Round represents the next stage of the NSW SCP and forms part of a broader, long-term strategy to support vulnerable Basin communities.

This round targets investment in critical infrastructure that:

- Unlocks industrial and economic development;
- Creates new economic opportunities;
- Delivers long-term and sustainable benefits for affected communities.

The round prioritises infrastructure that supports new economic activity and reduces barriers to workforce participation, particularly in NSW Basin communities impacted by water recovery.

Funding is intended to support infrastructure and enabling works in vulnerable NSW southern Basin communities that contribute to ongoing economic growth and workforce participation. Projects may include, but are not limited to, those that:

- Support economic activity across multiple industries and deliver broad community benefits;
- Unlock land for industrial, commercial or housing development;
- Create new local economic opportunities;
- Provide infrastructure to support population growth, enabling people to continue to live and work locally.

Key delivery and funding conditions include:

- Project commencement: Projects must commence within six (6) months of the funding deed being executed;
- Project completion: All projects must be completed by 31 May 2029;
- Co-contribution: Local Government organisations are required to provide a minimum co-contribution of 25% of the requested funding, which may be provided as either cash or eligible in-kind contributions.

It is intended that the Lake Wyangan & Catchment Management Committee consider and propose any project options it believes are suitable and worthy of submission for a grant application under this funding round.

In considering potential projects, the Committee should assess:

- Alignment with program objectives;
- Deliverability within the required timeframe;
- Capacity to attract or justify the required co-contribution;
- The extent to which the project supports long-term economic resilience and community benefit.

		addressing sediment and nutrient discharge into North Lake; and A map outlining current land claims surrounding Lake Wyangan.		
17 July 2025	CL02 Items/Actions submitted for Agenda by Committee	Can MI share historic water quality data for the South Lake including EC and pH levels? The Committee would like to assess the viability of dropping the EC through increased water turnover.  Ms Golsby-Smith advised MI is willing to share data however Council should request this formally by letter.	Director Sustainable Development	26/11/25: MI has provided this information to Council via email 18/9/25. This data will be reported to the committee at a future meeting in 2026.
17 July 2025	CL02 Items/Actions submitted for Agenda by Committee	Mr Stonestreet raised the question of access to supplementary flows for example in periods of high rainfall and flooding. Ms Golsby-Smith stated that MI can hold over water for customers and an application can be made to general security surplus however Council would need to own a supplementary entitlement. Council and MI are to discuss this further.	General Manager/ Director Sustainable Development	26/11/25: MI and Council will continue to have discussions on this matter.
17 July 2025	CL02 Items/Actions submitted for Agenda by Committee	Mr Battistel enquired what happens to the unused water now? Ms Golsby-Smith advised she would take this on notice.	Murrumbidgee Irrigation Representative	26/11/25: Unused allocation in any given year that is not used by MI customers goes back to the resource set which is managed by State Government.
17 July 2025	CC01 Draft Expressions of Interest – Engineering Design Concept of Sediment and Nutrient Discharge Treatment into North Lake Wyangan	<b>RECOMMENDED</b> on the motion of Matt Woodward and John Tagliapietra that the draft Expressions of Interest – Engineering Design Concept of Sediment and Nutrient Discharge Treatment into North Lake Wyangan document be approved and Council formerly call for Expressions of Interest for the project.	Director Sustainable Development	26/11/25: EOI results to be reported in early 2026 as review of documentation being completed.

17 July 2025	<b>General Business</b> <b>7.2 Costing for Larger Pump</b>	Mr Salvestro enquired if Council would investigate the cost of a larger pump? Councillor Curran advised this could be done on the back of the Flood Study.	Director Sustainable Development	<b>26/11/25:</b> On hold as awaiting results of Lake Wyangan Flood Study recommendations.
19 June 2025	<b>CL01 Presentation Optimal Stormwater</b>	<b>RECOMMENDED</b> on the motion of John Tagliapietra and Ema Munro that a Committee meeting be held in one month to consider a draft scope prepared by Council staff for the purpose of obtaining a quote for a sediment and nutrient discharge treatment at the North Lake.  Mr Stonestreet requested the Committee also be provided with the likely cost of sediment removal once a system has been installed.  Councillor Testoni requested that the Committee be informed who owns the land in the proposed location and whether or not it is subject to a Land Claim.	Director Sustainable Development	<b>26/11/25:</b> EOI results to be reported in early 2026 as review of documentation being completed. Lake Wyangan Strategies report and Land Claims report to be presented at committee meeting 11/12/25 will discuss land ownership.
